

Personal statement

A graduate of Forestry and Wildlife from the Federal University of Agriculture Abeokuta with specialization in forest biology and genetics. During my study at the University I have been exposed to the various aspect of Forestry including Silviculture, forest genetics, forest conservation, forest ecology, and biodiversity and ecosystems management.

I had over 10years experience as a research scientist at the Forestry Research Institute of Nigeria (FRIN). I have been able to produce over forty publications which include 20 journal papers, 25 conference proceedings and five peer reviewed books. In various aspects of forestry such as forest genetics and Silviculture, biodiversity conservation, climate change and environmental management, fforest biometrics and remote sensing. To broaden my knowledge in research I have undergone training in gene sequencing, scientific data collection, and data analysis using various softwares mos especially SPSS.

As a prolific and goal-oriented scientist, I have involved in various activities that facilitate biodiversity and environmental conservation such training of high school and university students

on afforestation and environmental degradation and management, climate change and global consequences of loss of biodiversity.

I hereby wish to express my interest to further my study (Ph.D program to be precise).in the Department of Environmental Studies at The University of Memphis. I am a very enthusiastic and motivated individual that refuses to accept the current destructive state of our planet. Studying this degree will be the first step in enabling me to make a difference and conserve environment as our collective heritage before it's too late. I want to study this course to enhance my current academic credentials and prepare myself as a career-ready graduate with the require knowledge in environmental science.
