The Admission Officer,
The University of Memphis,
Tennessee, United States,
Dear Sir / Madam,

I am Osaro Appolos Gombando, a Nigerian national from Port Harcourt, Nigeria. Holding a Bachelor's degree in Chemical Engineering from the University of Port Harcourt and a Master's degree in Chemical/Petrochemical Engineering from Rivers State University, I am eager to pursue a Doctorate in Chemical Engineering. My primary motivation is to develop innovative solutions to the persistent flare gas issues plaguing the oil and gas sector globally.

Throughout my academic journey, I acquired a comprehensive foundation in chemical engineering principles, including Engineering Mathematics, Chemical Engineering Thermodynamics, Transport Phenomena, Separation Processes, Chemical Kinetics, Engineering Materials, Chemical Engineering Analysis and Biochemical Engineering. My postgraduate studies further enhanced my expertise in Chemical Reaction Engineering, Process Control, Chemical Plant Design, Environmental Pollution Engineering, Polymer Engineering and Process Optimization.

As a member of various professional bodies, including the Society of Petroleum Engineers (SPE), the Nigeria Society of Engineers (NSE), etc., I have stayed abreast of industry developments and best practices. My professional experience in Nigeria's renowned organizations, such as Indorama Eleme Fertilizer and Chemicals Limited and Notore Chemical Industries, has honed my skills in: Research and analysis, Team collaboration and leadership, Time management, Logical reasoning and problem-solving, Effective communication and interpersonal skills.

I am driven by a passion for knowledge and a desire to contribute meaningfully to the oil and gas sector. Benjamin Franklin's quote, "An Investment in Knowledge Pays the Best Interest," resonates deeply with me.

I am confident that my academic background, professional experience, and research skills make me an ideal candidate for your esteemed institution's Doctorate program. I am eager to leverage your institution's resources and expertise to explore innovative solutions to the complex challenges facing the oil and gas industry.

Upon acceptance, I commit to upholding your institution's rules and regulations, actively contributing to academic discussions, and producing original research that advances the field of chemical engineering.

Thank you for considering my application.

Best regards.

Osaro, Appolos Gombando.
