BSc. in Software Engineering, Second Class Honours (Upper Division)

Experience

Babcock University | Ogun, Ilishan-Remo

Laboratory Technologist | 01/2024 - Present

- Collaborating with the academic department to create lab manuals for students according to their levels.
- Providing trainings / practical sessions for students and technical support to faculty staffs.
- Installing, configuring, and troubleshooting computer hardware and softwares.

Aquaries Multipurpose Cooperatice Society | Lagos, Surulere

ERP & Web Solutions Developer | 12/2022 - 11/2023

- Configuring and customizing ERP systems to optimize performance and usability, and ensuring adherence to industry best practices and standards.
- Staying up-to-date with emerging technologies and trends in ERP and web development, and leveraging this knowledge to continuously improve system design, architecture, and functionality.
- Integrating ERP and web solutions with other systems and platforms, such as third-party applications, cloud services, or mobile devices, to enhance functionality and streamline business processes.

Project Manager / Developer | Ogun, Ilishan-Remo

Babcock University | 11/2021 - 05/2022

- Independently developed a comprehensive proposal for a new system, outlining key features and functionality in detail. Took a hands-on approach to the project, conducting research, identifying requirements, and developing a plan for implementation.
- Collaborated effectively with team members in developing the system app for the project, contributing to its successful completion within the given timeline.
- Implemented software development methodologies, tools, and processes to improve efficiency, quality, and productivity of the system.

HIIT PLC | Lagos, Ikeja

Software Intern | 01/2021 - 06/2021

- I completed web design courses and gained hands-on experience working on projects which include developing websites and creating interface designs for businesses, individuals and other online platforms.
- Completed a Certificate in Digital Literacy (CDL) course, specializing in Microsoft PowerPoint, Excel, and Word.
- Designed and developed responsive, user-friendly websites with an emphasis on usability and accessibility.
- Trained in Graphic Design with expertise in creating designs for products, logos, and advertisements suitable for use in corporate settings.
